EARLY DEVELOPMENT AND DELAYS: LEARN THE SIGNS OF AUTISM AND ACT EARLY TRAINING!

Free training for all child care providers....

This 6 hour training was developed at the Centers for Disease Control and Prevention (CDC) to promote awareness of developmental milestones in early childhood, the importance of tracking each child’s development, and the importance of acting early if there are concerns. The CDC estimates that 1 in 68 children has been identified with an autism spectrum disorder, and developmental screening and early identification are important for promoting positive developmental outcomes for young children.
