Moody Garden Irrigation System
The original estimates for a new system did not cover all the parts for the project, it was labor only. University of Arizona students will be using the garden as a project to help determine the best type of system that needs to be installed.

Funds are continuously being raised for the irrigation system as multiple leaks are continuously being repaired. We as Master Gardeners have donated $500 towards the irrigation system. These were funds raised by the greenhouse project last year.

If you know anyone that can either donate or supply parts, please contact Stacey Bealmer-Jones at staceyb@cals.arizona.edu
