

NAWT Inspection Certification Renewal Course

After previously completing of the 2-day National Association of Wastewater Technicians, Inc. (NAWT) Inspection Training course and the course exam, you are required to renew your NAWT Inspector Certification every 2 years to maintain your certification. This one-day course is specifically tailored to review the most important aspects performing transfer of ownership inspection in the state of Arizona and give you your 8-hours of continuing education needed for NAWT Inspector Renewal. In past years, returning inspectors looking to renew their NAWT certification had to take day 1 of the 2-day course where we focus on the basics. This course will allow us to give more relevant information to our returning inspectors, including a more advanced review, common issues, and any new information that has come out in recent years.
