

Uncommon & Unusual Cactus & Succulents

Your Southeast Pinal County Master Gardeners are pleased to invite you to attend our Community Education Presentation.

Wednesday, December 11, 2024 1:00 pm

SaddleBrooke Ranch, Sol Ballroom

31143 S. Amenity Dr., Oracle, AZ 85623

Many of us are familiar with the more common cactus varieties such as the golden barrel, prickly pear, agave and saguaro we see sprinkled throughout the Sonoran desert and found in many of our neighboring landscapes. In welcoming back Mark Sitter, owner of B & B Cactus Farm, he will introduce us to many more varieties that fit the description of *uncommon* or *unusual* and are cold hardy. In addition, Mark will answer your questions, address how to care for cactus and succulents including choosing the best location, proper seasonal watering practices, propagating, fertilization and much more.

Hope to see you there!
