Living in Arizona provides an opportunity to enjoy the outdoors, experiencing an abundance of beauty and variety in nature. Have you noticed critters in your yard? Do you wonder, "What is that?" In this presentation we will learn about scorpions, snakes, lizards, and other critters as well as their habitat. You will learn what to do if you encounter them in your home and yard. We will also learn about the Catalina State Park Nature Programs and how to visit their facility. Interested in seeing some of the critters in terrariums? Many will be available to view after the presentation.
