

SAVE THE DATES!!!

University of Arizona College of Agriculture & Life Sciences Co-sponsored

2023 Onsite Wastewater Education Program Classes:

NAWT Certification Renewal Course
July 17-18 or July 24-25 (8 Hours Total)
Online via Zoom Meeting

NAWT Inspection Training
August 14-15
Location TBD

Intro to Design of Onsite Wastewater Treatment Systems
October 16-17
Location TBD

Advanced Design of Onsite Wastewater Treatment Systems
October 18
Location TBD

Soil & Site Evaluation for Onsite Wastewater Systems
October 23-25
Location TBD

NAWT Certification Renewal course

This course is intended for inspectors seeking NAWT Renewal and will not allow you to take the exam to certify with NAWT for the first time. After previously completing of the 2-day National Association of Wastewater Technicians, Inc. (NAWT) Inspection Training course and the course exam, you are required to renew your NAWT Inspector Certification every 2 years to maintain your certification. This one-day course is specifically tailored to review the most important aspects performing transfer of ownership inspection in the state of Arizona and give you your 8-hours of continuing education needed for NAWT Inspector Renewal. In past years, returning inspectors looking to renew their NAWT certification had to take day 1 of the 2-day course where we focus on the basics. This course will allow us to give more relevant information to our returning inspectors, including a more advanced review, common issues, and any new information that has come out in recent years.

NAWT Inspection Training

Did you know that you are now required to attend an ADEQ-approved course *before* initiating the real estate inspection? Your successful completion of the 2-day ADEQ approved course and certification test will result in your name being listed as a certified inspector with both NAWT and ADEQ. This list is posted on the NAWT website (www.nawt.org) and visited by property owners and real estate agents engaged in the Arizona Transfer of Property Inspection Program under AAC R18-9-A316. *This course is a pre-requisite for all University of Arizona Onsite Wastewater Treatment courses.* **Other Certification:** This workshop qualifies for 16 professional development hours (PDHs) and 13.5 contact hours for Arizona Registered Sanitarians.

Intro to Design of Onsite Wastewater Treatment Systems

This is a 2-day course on designing onsite wastewater treatment and dispersal systems using Arizona regulations primarily for gravity distribution and residential applications. A homework assignment will be used to provide practical application of material learned in the workshop. Please bring a calculator and writing implement. **Prerequisite:** All participants will need to have completed both the NAWT Inspection Training & Certification and Soils & Site Evaluation courses. **Other Certification:** This class qualifies for 16 CEU hours for maintaining NAWT certification, 16 Professional Development hours (PDHs), and 16 contact hours for Arizona Registered Sanitarians.

Advanced Design of Onsite Wastewater Treatment Systems:

This one-day course in advanced design of onsite wastewater treatment systems will cover a topic to be determined. **Prerequisite:** All participants will need to have completed both the NAWT Inspection Training and Soils & Site Evaluation courses. **Other Certification:** This class qualifies for 8 CEU hours for renewing your NAWT certificate.

Soil & Site Evaluation for Onsite Wastewater Treatment Systems

This is a 3-day, **ADEQ-approved** course covering soil and site evaluation for onsite wastewater treatment systems. Successful completion of the course completion exam will result in your name being listed as a Registered Soil & Site Evaluator for ADEQ. The course will be conducted both in the classroom and in the field. Topics to be covered include: water movement and acceptance; soil treatment; soil evaluation including description of texture, color, structure, and consistence; and site evaluation procedures. **Prerequisite:** You must have participated in a NAWT Inspection Training & Certification workshop to attend this course. **Other Certification:** This workshop qualifies for 24 professional development hours and for 21.6 hours of contact hours for Arizona Registered Sanitarians.
