*Development for variety with relative maturity rating of 115 days*
Weather Forecast
-A low pressure system will impact AZ weather Monday & Tuesday, producing windy & cooler conditions with a chance for scattered showers. Clear, warm & dry conditions will redevelop beginning Wednesday & continue through the coming weekend.

-Most rivers in the Upper Colorado River Basin are running well above median flow due to an abundant snow pack that is melting at a rapid pace. Spring flow (Apr-Jul) into Lake Powell is now projected to be 9.2 MAF, 28% above normal. Flow for the current Water Year is projected to be 12.1 MAF, 12% above normal. The most recent BOR 24-Month Report no longer projects a shortage for 2020. These projections are updated monthly.
