When ordering beneficial insects, know:

- What pests you need to control.
- Proper timing of beneficial insect release based on life cycle of pest (when you order).
- How many you need to release (the release rate).
- A safe delivery address where the shipment will be cared for as soon as it arrives and won't be exposed to extreme heat or cold.
- Proper release procedures, such as time of day, food and water needs, etc.
- Proper storage methods if the insects can't be released immediately.
