WINTER WATER UPDATE

Paul Brown

This has been a good few weeks in the Colorado Rockies and southeastern Arizona, but precipitation/snow totals for the Water Year remain well below normal. The spring flow forecasts have ticked up slightly in the past few days, but remain very low. Spring flow in most Arizona rivers is projected at <30% of median. Spring flow (April through July) into Lake Powell is now forecast at ~56% of median. The bottom line is that we need several more of these storms and a significant increase in high elevation snow to significantly improve the water supply situation for 2018.

THE 4TH ANNUAL ARIZONA ALFALFA AND FORAGE CROPS WORKSHOP

Do you want to learn about the latest forage quality, water usage, economics, agronomic and pest management of alfalfa and forage crops?

Join Us...

When: Wednesday, March 28, 2018 / 8AM – 1PM
Where: Maricopa Agricultural Center (MAC), 37860 W. Smith Enke Road, Maricopa, AZ 85138
Who should attend: Growers, PCAs, Ag industry and government representatives, and anyone interested in field crops in Arizona

FARMING WITH BENEFICIAL INSECTS FOR PEST CONTROL:
