V Bar V Beef Cattle Artificial Insemination Clinics

Testimonials

- *I think the workshop was excellent. Everyone who presented delivered the information in a way that it was very understandable. Also, I really appreciated they we would slow things down so that everyone got the concepts.*
- Compared to my knowledge coming into the class, I feel much more confident and comfortable with the process and information. There is still a lot to learn but this clinic has vastly improved the basics of the technique. It will be beneficial to audit the class in the future.
- All presentations were easy to understand and "user friendly." The jump drive is a huge bonus. Thank you all for your time and efforts!! I also really appreciate the patience and encouragement of the staff and Agents. You guys are great!!
- Appreciate attending class again and participating as auditor. This is very helpful and a confidence builder. Instructors are very patient. Glad you added low stress handling. For a newbie to the cattle ranch this class helped me very much and stirred me in the direction that I want to get. Excellent job. Thank you for this opportunity.
- Program covered more than I expected. Other than needing more practice, I feel more confident moving forward with my program with the knowledge gained from this workshop.
- A must for me, after no result of A.I. in our herd. Now makes since of the why [I wasn't successful before]. Now I like to practice myself and learn more, so I will be the inseminator for my heard.
