Advanced Smartscape: Plant Materials builds upon the Smartscape course experience with twelve hours of in-depth training for landscape professionals on plants best suited for water-efficient landscapes in our desert environment. Attending the basic Smartscape series gives participants an understanding of conditions typically found in our landscapes that affect proper plant selection and care.

After completing this four-class course, students will be able to effectively integrate a wide selection of regionally-appropriate plants into landscape designs and provide proper maintenance by implementing the knowledge gained in Advanced Smartscape.

Please note, completion of Smartscape is a prerequisite to register for Advanced Smartscape.

CEUs have been applied for with the Western Chapter of the International Society of Arboriculture (ISA), the Association of Professional Landscape Designers (APLD), and the Arizona Chapter of the American Society of Landscape Architects (AzASLA).

Advanced Smartscape: Plant Materials course schedule:

- Plant Nomenclature, Morphology: October 26
- Trees, Shrubs, Perennials: November 2
- Groundcovers, Vines: November 9
- Cacti, Succulents, other Accent Plants, Annuals: November 16

Spaces are limited and fill quickly—register today! $95 per person (for the entire course)

Registration fees are non-refundable.
