Saturday

8:00 am – 9:00 am	<p>It's All About Those Bugs!! How the equine biome affects digestion and health Dr. Karen Davison Register for 1/23 8:00 am</p> <p>Probiotics, prebiotics, bacteria, protozoa, digestive health supplements, so much to sort through to find what truly affects digestion and health in horses. In this session, you'll learn the latest science-supported information about the equine microbiome; who lives in your horse's digestive system, what they do there and how we can positively impact them.</p>
10:00 am – 11:00 am	<p>Melanoma: Harmless Bump or Ticking Time Bomb? Dr. Christine Staten Register for 1/23 10:00 am</p> <p>Melanoma is one of the most common types of skin tumors found on horses. Learn more about identifying melanoma, when to call your vet, and possible treatment options.</p>
12:00 pm - 1:00 pm	<p>Those Pesky Flies! Pigeon Fever and Habronema Dr. Ann Pearson Register for 1/23 1:00 pm</p> <p>Flies are more than a mere nuisance in the barn they increase the risk of disease to your horse.</p>
2:00 pm - 3:00 pm	<p>Does Your Horse Need Social Distancing? Dr. Betsy Greene and Dr. Ann Pearson Register for 1/23 2:00 pm</p> <p>Learn more about the concerns with taking horses to shows, introducing new horses, and traveling across states or internationally. We will cover what questions to ask and what to plan for so that you can keep your horse safe. We will also cover what vaccines are required for travel and how to help protect your horse from contagious diseases that do not have vaccines.</p>

<p>4:00 pm – 5:00 pm</p>	<p style="text-align: center;">Eyes Wide Open: Equine Eye Problems Dr. Ashley Edge Register for 1/23 4:00 pm</p> <p>This lecture is a comprehensive discussion on common ocular maladies of the horse. We'll begin by talking about eye anatomy and follow that with an in-depth conversation on corneal disease. We'll wrap up by discussing the most significant causes of disease to the deeper eye structures, including "moon blindness" and cataracts.</p>
<p>Sunday</p>	
<p>12:00 – 1:00 pm</p>	<p style="text-align: center;">Horse Health: What's a 5-way Anyway?! Dr. Lauren Hood Register for 1/24 12:00 pm</p> <p>This is a discussion on protecting your horse against deadly diseases. We will take an in depth look at these infectious viral and bacterial pathogens, and discuss the preventative measures we can take to help protect your horse.</p>
<p>2:00 - 3:00 pm</p>	<p style="text-align: center;">Viewing a Horse Through the Eyes of a Farrier Eddie McKenzie and Olivier Fahrni Register for 1/24 2:00 pm</p> <p>Gain a thorough understanding of the hoof structures and functions. Learn techniques to have your horse stand properly for the Farrier. Q&A session – everything you always wanted to ask your farrier!</p>
<p>4:00 – 5:00 pm</p>	<p style="text-align: center;">Colic: The #1 Killer of Horses Dr. Alexis Ivanecky Register for 1/24 4:00 pm</p> <p>This lecture will discuss clinical signs, causes, and treatment of colic in the horse.</p>
