

MASTER GARDENER DEMONSTRATION GARDENS

Whether you wander on your own, or join a free guided tour by a Master Gardener, our 14 unique Demonstration Gardens will expand your gardening knowledge and give you many ideas for your own landscape. Our goal is to help you become a more successful gardener, so bring your camera, a small notebook and a pencil to record plant names and other things that interest you. Above all, immerse yourself.

All-American Selections

An official AAS Display Garden presenting award winning flower and vegetable selections.

Wildlife Habitat

A Certified Wildlife Habitat showcasing a mix of plants and hardscape elements to provide food and shelter for birds, animals and insects.

Butterflies, Birds and Bees

In our pollinator garden discover a variety of nectar and larval food plants designed to attract winged creatures.

Native Grasses

Appreciate the beauty, variety, and usefulness of native grasses in the landscape.

Edibles, Basin Style

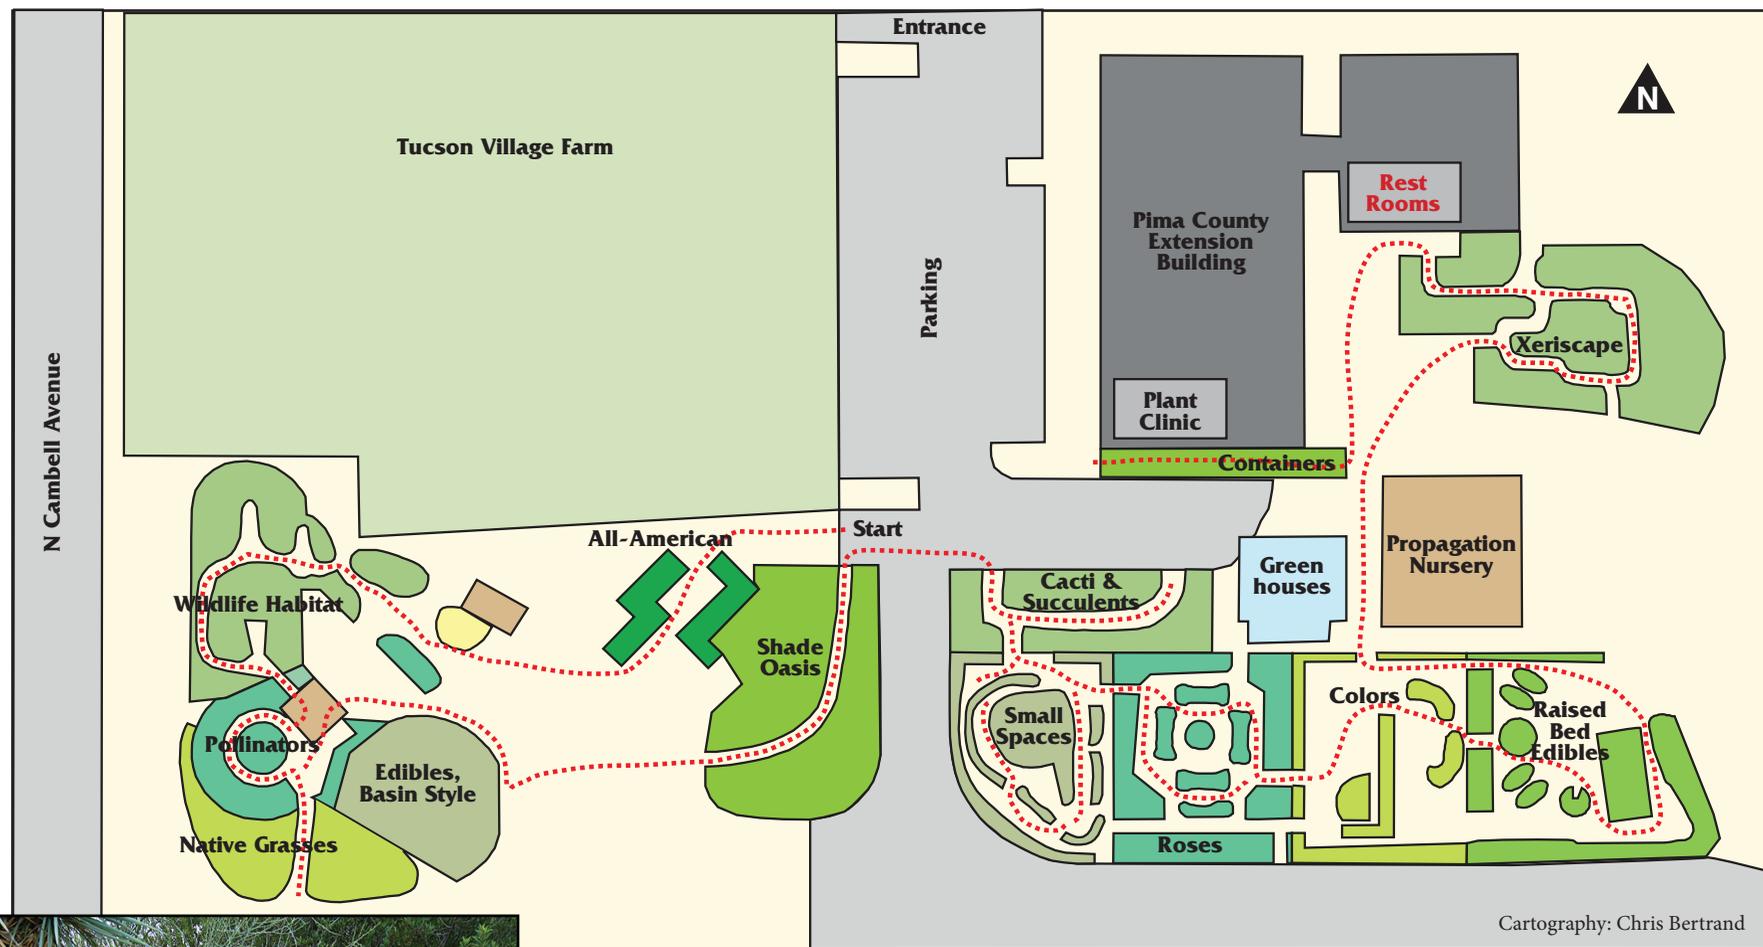

A productive in-ground-bed growing technique is used for year-round vegetables, fruits, and herbs.

Shade Oasis

Explore a garden designed to reflect a riparian and meadow environment in the Sky Islands at around 4500 feet.

Cacti and Other Succulents

A prickly assortment, artfully arranged for maximum show.

Photography: Dale Windham & Tony Knight

Small Spaces

Landscape possibilities for smaller areas using smaller flowers, shrubs, and trees.

Roses Galore

Dozens of mature hybrid tea and floribunda roses in luxuriant bloom and perfume in the spring and fall.

Colors

Promotes flowering plants and ground covers amid decorative features such as pathways, boulders, mulch, and benches.

Edibles, Raised Bed Style

Showcases warm and cool seasonal vegetables, perennials, and fruits in an array of raised bed containers.

Propagation Nursery

Our energetic elves create thousands of new plants in here each year for our spring and fall plant sales.

Xeriscape Landscape

A lush garden of many low-water-use plants organized into three zones according to water use: moderate, low and very low.

Contain Yourself

Explore creative ways to display plants in containers for your patio or other small space. Visit this area and you will say, "I can do that!"

Plant Clinic

"The doctors are in" at our plant clinic Monday through Friday to answer your questions and help with your plant problems. It's free, with no appointment necessary. You may visit, or call at 520-626-5161.
