

## **WRRC SEEKS TWO POST-DOCTORAL RESEARCH ASSOCIATES**

The University of Arizona (UA) Water Resources Research Center (WRRC) is seeking two post-doctoral research associates for 24-month positions beginning in early 2022. Both positions require that the candidate hold a PhD in a field with relevance to the position description at the time of hiring.

### **Postdoc #1**

This position with the WRRC's Water RAPIDS (Research and Planning Innovations for Dryland Systems) program will involve both independent and collaborative research, including stakeholder engagement, to advance understanding of water resources topics in Arizona and the wider region. Candidates should have advanced knowledge of geospatial platforms and experience applying spatial concepts in their research. Experience with science translation, stakeholder processes, and policy analysis are also required. Click on the link below for position description and application instructions.

[Apply](#)

### **Postdoc #2**

This position will contribute to multiple WRRC programs, particularly Diversifying Voices in Water Resources (DViWR) - the WRRC's outreach to and engagement in Arizona's rural and Tribal communities. Working independently and collaboratively, the successful candidate will plan and carry out research that supports awareness and literacy on water resources issues, and builds capacity, especially among disadvantaged groups. Candidates should have advanced knowledge and experience in multidisciplinary research, community engagement, science translation, and water resources policy processes. Click on the link below for position description and application instructions.
