Tips for good password

- **Longer is stronger.** The best passwords are at least 10 characters in length. Include some capitalization and punctuation.

- **Use a phrase.** Passphrases are easy to remember, but difficult to guess. If the service will allow, use spaces as special characters for added strength. This also makes the phrase easier to type.

- **Misspell a word or two.** Make a note of what was misspelled until typing the pass phrase becomes a habit (usually within a few days).

- **Consider** using a nursery rhyme, movie quote, or song lyrics, and then put a twist on it. Here are some examples (*DO NOT USE THESE EXAMPLES, or any phrase you find directly on the internet)*:
  - **Nursery rhyme example:** The green cow jumped over the moon!
  - **Twisted movie quote:** The films became miniscule? (twist on Sunset Boulevard quote)
  - **Twisted song lyric:** Infant, We Will Race (twist on "Born to Run" lyric)

- A good password is one that is easy for you to remember, but difficult to guess.
Email instructions will send you here:

Select this 1st, follow instructions

Do this step 2nd, you need your NetID and password to get in. Follow instructions.
Already have a NetID, but need to reset your password?
Select this option.
Enter your DCC/EmplID number and your birthdate. This number is in the emails you got from FSO.Arizona.edu. Then select Next.
