What are Child Care Health Consultants?
The goal of the Child Care Health Consultant (CCHC) is to provide support and improve clients program and its operation through **Advocacy, Policy Development, Education and Training, Research, Resource and Referrals**. They address the health and safety needs of young children in child care settings.

What do our services include?

- Connecting programs to health and safety resources
- Helping with health and safety promotion
- Assisting centers in maintaining licensing requirements in the areas of health and safety
- Training center staff on medication administration
- Coordinating emergency trainings such as First Aid and CPR
- Reviewing immunization records
- Providing trainings on infection control and communicable disease prevention
- Helping centers develop policies and procedures
- Providing trainings specific to health and safety needs for parents, staff and children
- Providing advocacy for children and parents to access healthcare
- Keeping child care programs aware of the latest evidence based information and research practices

Trainings available for center staff

- Public Health And Sanitation – *covering cycle of infection, sanitation aspects in nutrition, diapering, medicine dispensing, hand washing techniques and other daily activities in and outside the classroom.*
